

Assignment 1

Due: Friday, 12/02/2016 11:59pm

Total score: 25

Submission: Email to mbulut@pace.edu. The assignment can be done in a group of 2 or 3 person. Include everyone's names in the submission.

1. (3 points) Take one or more data sources – you can use the ones you identified during the class or a new one. It may even be a combination of different datasets. Be specific about the dataset you chose and explain it.
2. (10 points) Come up with a business problem that could be addressed with the dataset you chose.
 - a. Using the 7 steps in Chapter 3.5 identify and validate the opportunity and explain how you move to production.
 - b. Executing the steps in Chapter 3.5 requires different roles of people. Identify these roles referring to Chapter 3.6 (such as technical evangelist, business analyst etc.).
3. (2 points) Define your acceptability for adoption; go/no-go criteria (See Chapter 4.4).
4. (5 points) Comment on the privacy issues that may arise with the use of the dataset.
5. (5 points) Comment on the data governance of your dataset considering 5 key concepts in Chapter 5.4.
